GARUDAN®

► **Máquina de triple arrastre costura plana para materiales médios y pesados**

Máquina de costura plana industrial de una aguja, equipada con corta-hilos, alza-patas y retroceso automático, motor servo direct drive de 750W a 220v con programador, puente de 32,5 cm largo × 14cm altura, dial regulador de altura de pata, engrase automático, largo máximo de puntada 8mm, altura máxima prensatelas 16mm, garfio grande por abajo canilla de 26mm, velocidad máxima 2.200 puntadas por minuto, luz led, etc.. Se sirve completa con bancada y tablero .

► **Flat bed sewing machine for sewing of medium and heavy-weight materials**

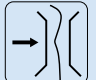

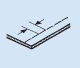

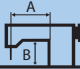

Flat bed single needle lockstitch industrial sewing machine with lower drop and presser foot feed (double feed). The machine is equipped with direct drive servomotor 1 × 230 V and integrated LED light. Functions of automatic thread trimming, backtacking and presser foot lift accelerate production and reduce consumption of threads. Feeding of material is ensured by double feed system (feed dog + walking foot). Possibility to use threads up to thickness Nm. 15. Maximum stitch length 8 mm makes this machine suitable for precision sewing of medium-weight materials, such as upholstery, sports accessories, furnishings, etc. Enlarged working space between the arm and needle (325 × 140 mm) is favourable for sewing of voluminous materials.
